WELCOME ADDRESS

+++ ATTENTION +++

In the light of the latest developments of the COVID-19 Situation in Europe and as a health and safety precaution for our exhibitors, visitors and partners we have decided to postpone this year's ISIORT Conference, which will now take place from

June 18th – 19th, 2021.

Dear members and supporters of ISIORT,

When we decided to postpone the ISIORT Conference to November, we all felt that this date would most probably be on safe grounds.

From today's perspective however, the global COVID situation remains unclear, and a regular conference in fall is more than doubtful. This is less due to the conference size, but rather to the international nature of our Society.

We are just concerned that at that point of time, a majority of colleagues will either still be faced with travel restrictions or feels unsure with travels to abroad.

Therefore, the ISIORT Board has unanimously favored a further generous deferral to June 18th – 19th, 2021.

Unlike other societies, we did not consider a mere web meeting, where one of the most essential aspects of a scientific conference is completely missed: social interaction!

Especially in our smaller, but very particular and exquisite community, we should not miss the chance to meet or get to know each other in direct contact!

You remain strongly encouraged to submit an abstract until April 15th, 2021 and become part of this prestigious event.

If you have already booked hotel rooms or travel arrangements, please do not forget to cancel/shift in due time!

Looking forward to June 2021,

Kindest regards,

Felix Sedlmayer
President ISIORT
